Weighing for a Wide Variety of Applications

The HV/HW-C/CP scale family is designed to integrate easily into your weighing process. It offers a broad range of solutions for your checkweighing, parts counting or quality assurance applications. Raise your throughput, increase process security and improve your product and delivered quality

Secure Compliance Feel secure in your weighing process with built-in key lock function to prevent any unwanted changes and seamless data capture with available built-in printer. You can meet NTEP and Measurement Canada requirements with the HV-C and HV-CP models

Increased Throughput Speed up your weighing process with 1-second stabilization and a wide selection of accessories and connectivity options. Control the scale, change settings and output data via USB or RS-232C. Comparator lights reduce operator fatigue and errors.

Improved Ergonomics Large backlit terminal is visible even in dimly lit areas. Avoid neck and back strain with adjustable terminal head or with optional remote display and wall-mount bracket. Rollers make weighing heavy or large containers in production lines smoother and quicker.

Reliable Counting & Portioning Fast and efficient portioning and filling with Auto-Tare, which automatically tares the scale when the weight reaches a pre-set range. Combined with our Negative Checkweighing feature, you can now easily move parts from a master carton on the scale to containers on a production line.

Robust & Dependable IP65 rated base along with stainless steel weigh pan (SUS430) allow for wet weighing and is easy to keep clean and hygienic. All HV/W-C models can be easily moved and placed to best fit your process. They operate anywhere off of four standard D batteries.
