Build the Right Wheel Weigher System for your specific needs!

Utilizing optional dummy plates and dummy plate connectors, build a wheel weigher system that fits your specific needs! For in-motion weighing applications, use a single axle layout (2 scale platforms) including sufficient ramps and dummy plates to insure optimum level weighing conditions. For static weighing, the RWT-F wheel weighers may be joined via optional plates and connectors, allowing up to 12 platforms to be wirelessly interfaced via the RWT-5000F Indicator/Printer.

The RWT-5000F Indicator/Printer is enclosed in a portable, water tight case and provides weight information that includes individual wheel weight, individual axle weight, and total weight. Also included in RWT-5000F are built in USB and RS-232C ports, optional USB memory stick, memory for up to 10,000 vehicles, and connectivity to model CRD2300F/3000F wireless Remote Display units. **Self Contained Portable Unit** The RWT-5000F Wireless Indicator is housed in a protective hardened plastic case with waterproof seals when closed. **Zigbee Wireless** The RW-Z Series Wheel Weighers features Zigbee Wireless technology. Connect up to 12 RWT-F Wheel Weighing Pads within the same communication range. **Printer** The RWT-5000F includes a high speed thermal printer. Prints receipts with 100 mm/sec speed and 202 dpi resolution. Use with CAS Receipt Paper #TS-25050 **Interface** The RWT-5000F is equipped with a RS-232 output for PC interface, USB port, DC jack, and wireless communication capabilities to CAS Wirelsss Remote Displays **Display & Keypad** The RWT-5000F is equipped with a backlit LCD Display and numeric keypad
