Features

Parcel dimensioning and back charge protection for shippers

Cubetape C190SHP parcel dimensioner works readily with any shipping software (e.g. UPS WorldShip, FedEx Ship Manager, ADSI Ship-It, etc.) to eliminate the manual data entry of length, width and height.

Besides reducing the labor burden brought on by the carrier dimensional weight changes, the accuracy of Cubetape C190SHP parcel dimensioner eliminates the cost to your company of data entry errors.

Cubetape also has value for LTL shipments since it can readily record the length, width and height of each pallet on a shipment. When printed on the Bill of Lading and signed by the driver, the dimensions can be valuable documentation to avoid post shipment billing adjustments by your carriers.

Mobile data capture

Small enough to fit into the palm of your hand, the Cubetape C190SHP parcel dimensioner can be used to quickly and accurately measure parcels and pallets at anytime, anywhere within 10 feet of the workstation. Data is transmitted via Bluetooth to the host system and scanner options are available.

Easy to use

Requiring minimum operator training, the Cubetape C190SHP parcel dimensioner is used in the same way as a tape measure. Automatic data transfer and a user-friendly Human Machine Interface reduce human-error.

Simple Interfacing

Easy 2 minute install supports Worldship & FedEX ship manager.

Robust and Reliable

Designed for use in industrial environments, the Cubetape C190SHP parcel dimensioner is protected by a durable rubber cover. High quality electronics ensure accuracy and reliability over time replaceable pre certified tapes are available from your dealer.

Shippers, freight depots and on the road city drivers… Cubetape® delivers correct dimensional weight (volumetric weight) calculations in one go.

Portable, pocket sized and easy to use, Cubetape collects item and dimensional data, integrates seamlessly into existing applications to give accurate shipping costs for all freight types, solving the problem of back charges.

Your business needs a cost-effective solution for package measurement issues. Errors made in the manual data entry of length, width and height cause unexpected carrier chargebacks that affect your bottom line.
However, the high cost of most dimensioning systems is not justified for your POS stations
The solution must be compact and work with your ShipRite software. It must to be easy to use, even for new and seasonal employees.
You need a solution that is NTEP certified and virtually maintenance free.
The right device will help streamline the counter experience of your customers and reduce costly errors because customer satisfaction and trust are priorities for your business.
For your package measurement needs at the right price, Cubetape is your solution. It will be your barcode scanner, too.

- **ADVANTAGES OF CUBETAPE**
- Cubetape is efficient and saves up to 15 seconds per package. Combined with the productivity of your e.g. UPS WorldShip, FedEx Ship Manager, ADSI Ship-It, etc. software, customer satisfaction is increased since transactions are handled more promptly.
- Cubetape reduces carrier chargebacks because it eliminates the manual entry of package dimensions. Cubetape provides peace of mind that even new staff members are recording the correct package measurements
- Cubetape is also a cordless barcode scanner. This means a single, compact device serves two important functions in your store.
- Cubetape is 100% compatible with e.g. UPS WorldShip, FedEx Ship Manager, ADSI Ship-It, etc. and works out of the box without programming changes.
- Cubetape is simple to use, requires very little training and is extremely reliable.
- There is virtually no preventive maintenance or cleaning required. The Barcodes on Tape (BoT) measuring cassette is easily replaced without tools and lasts 3 months + under expected usage.
- At about the cost of an electronic scale, Cubetape is both affordable and cost-effective.

- **CUBETAPE SHIPPER**
- The Cubetape Shipper model combines the Cubetape POS model with a cradle that is used for both Bluetooth connectivity and charging
- The cradle connects to your PC with an included USB cable. Cubetape connects via Bluetooth to the cradle by simply scanning a barcode on the cradle. Data from barcode scans and measurements is sent instantaneously from Cubetape to the cradle and into your ShipRite

software.

- Cubetape is NTEP approved for "legal for trade" use. It can confidently be used in your retail shipping store.

Specifications

SPECIFICATIONS & HIGHLIGHTS

C190-SHP

Measurement

Tape	0.75" x 120" / 19mm x 3.06 meters
Units	inches, mm and cm
Range	2" to 120"/6 cm to 300 cm (scan for under 6 cm/2")

Communications

Communications	Bluetooth® Class 2 SPP and HID profiles

Power

Li-ion	970mAh with 2-hour recharge cycle
Duty Cycle	Minimum 8 hours with heavy usage

Scanner

1D Optical	650mm visible laser diode
Program	All common symbologies and features

Functions

Two buttons	Power, Scan/Measure
Audio/Visual	3 LEDs; beep sequencing for alerts

Physical

Dimensions	140mm x 76mm x 31mm 5.5" x 3" x 1.5" x 1.25"
Weight	Approximately 230g/0.5 lb.
Cradle	127mm x 102 mm x 64mm/5" x 4" x 2.5"

Regulatory

Environment	C-Tick, CE and FCC Certifications
Metrology	NTEP NMI AU MC
NTEP	CC #16-018PA2

Other

Temperature	-20° to 50°, 14.F to 120.F
Humidity	Operating non-condensed 10% to 80%
Accessories	Cradle C190DSK: Holster Big Foot grip
Spares	Tape cassette, silicone cover, battery
Warranty	24 months excluding consumables
