## Features

Detecto's RP30 digital ingredient scale features 30 lb x 0.1 oz (15 kg x 5 g) capacity, a six digit, seven segment, 0.5 inch (13 mm) high backlit LCD display, weight accumulator memory to store the weighs of total ingredients being used, and a built in rechargeable battery with Auto-Off/Sleep Mode. A robust 360° rotating stainless steel platform tray ensures even distribution of ingredients, available as a round 13 inch (330 mm) or rectangular 17 x 13 inch (432 x 330 mm) variation

Rotating stainless steel tray for even distribution of ingredients

### The scale that pays for itself

Take a bite out of expenses with DETECTO's RP30 digital ingredient scales. A cake produced in a retail bakery can have up to eight ounces of excess icing applied. The Detecto RP30 series allows you to view the exact amount of icing as it's applied, reducing ingredient inventory costs based on weight. With a busy bakery completing several cakes per hour, product savings adds up fast. The rotating platform further reduces production time, creating big savings and a fast payback on your investment.

**Pizza Kitchens** - Detectos RP30 series scales are great for pizza preparation. The cost cutting advantages of monitoring ingredients become clear when you start considering the numbers. Eliminate excess usage of high-cost ingredients like deli meats, olives, and cheese, and this scale typically pays for itself in 3-6 months.

**Sandwich Shops** - This scale is a must for any sandwich shop. Monitor the weight of sandwiches as they are being prepared, making it an excellent training tool to teach young apprentices the importance of consistently making a great product without giving away valuable commodities. Equal and consistent proportions every time!

**Retail Bakeries** - Its not uncommon for frosted cake to carry between 6 and 8 ounces of excess frosting. Frosting costs around 75 cents per pound, so at 25 cakes per day, 6 days per week, 52 weeks per years, thats over \$2,500 a year in wasted overages in ingredients. Detectos RP30 series helps prevent this with consistent portioning.

**PUSHBUTTON TARE Speeds Weighing Operations** -Detectos RP30 series allows you to view the weight of icing or ingredients while they are being prepared directly on the scale. Pressing the TARE key allows you to view the weight of each individual ingredient as it's added to the product. Once the product is prepared, simply remove it from the scale and view the total weight of all ingredients.

- 30 lb x 0.1 oz Capacity
- Backlit Blue LCD
- Built-in Rechargeable Battery Power
- Choice of Round or Rectangular Stainless Steel Platters
- Displays Ingredient and Total Product Weights
- Patented 360° Rotating Platform

Specifications
