

The new Health-O-Meter 594KL was designed to weigh patients in hospitals that need a chair scale to be accurately weighed. When someone is disabled, conventional scales simply do not do the trick, and a digital chair scale is more comfortable for the patient and provide stability and accurate results.

Features

The Health-O-Meter 594KL was designed to weigh patients in hospitals that need a chair scale to be accurately weighed. When someone is disabled, conventional scales simply do not do the trick, and a digital chair scale is more comfortable for the patient and provide stability and accurate results.

The 594KL is a brand new economically priced digital chair scale. Since the 595KL was discontinued in 2009, Health-O-Meter replaced it with two new models offering different weighing capacities and features. This move turns out to really benefit consumers since they can still spend more for the higher capacity, but may choose something with a few less features to save money.

Healthometer - 594KL Digital Chair Scale

- **Value-Added Features** - Operating functions (LB/KG Conversion, LB/KG Lock Out, BMI, Zero, Tare/Pre-Tare, Hold/Release, Reweigh, Recall, Auto Zero, Auto Off) included at no additional cost
- **Easy to Use** - Clearly marked buttons make it easy to operate
- **Moveable Arm & Footrest** - The flip-arm and footrest allows for easier patient access and patient comfort
- **Sturdy Construction** - The sturdy construction of this scale provides a stable base that does not shake
