## Features

Optifit tips ensure perfect fitting and leak-tight sealing on Sartorius pipettes for maximum pipetting accuracy and reproducibility. The color coding of the tip trays enables you to easily find the matching color-coded Sartorius pipette. Moreover, Optifit tips are manufactured in an ISO 8 certified cleanroom environment.

The non-filtered Optifit Tips are designed for best possible fitting and sealing to secure the highest possible accuracy and precision. These pipette tips enable ergonomic and light tip attachment by being compatible with the Optiload feature in Sartorius Picus® Nxt, Picus®, eLINE®, mLINE® and Proline® Plus pipettes.

Optifit Tips are available in various packaging types for all your needs:

- Single Tray racks – purity certified tip racks
- Refill Packs - purity certified and ecological refill packages
- Refill Towers - space-saving and ecological refill packages
- Flexibulk boxes - space-saving, ecological and economical bulk boxes
- Standard bulk – economical bulk boxes

While Optifit Tip trays are colour coded for easy matching with a corresponding, colour coded Sartorius pipette, they do also match with most other pipette due to their universal design.

Strict quality standards, ISO 9001 and ISO 13485, are followed from tip R&D to production and

delivery. The purity certified tips are manufactured in ISO 8 classified clean room conditions to avoid any contaminations and are tested for DNase, RNase and endotoxins per each tip lot. Pre-sterilised tips are also available for the purest laboratory work.

- Extended length of 46 mm for better reach
- Contamination free pipetting with DNase, RNase and endotoxin free certified tips

**PROPERTIES**

Quantity	960
Volume	0.1 – 10 µL
Length	46 mm

**Primary Product Type** Tips

Product Family	Optifit Tips
Tip Type	Non-filtered tips
Purity	Non-sterile & free of DNase, RNase and endotoxins
Packaging	Single Tray
Dimensions (WxDxH)	480 × 260 × 70 mm
