Features

The Seca 216 height rod has a removable scale with a measuring range 0 – 90 inches which can be inserted variably into a 150 centimeter long plastic profile. The measuring rod is simply mounted on the wall at the desired height. This means that the user himself selects the measuring range shown in the profile – the Seca 216 is thus suitable for both adults and children. Already during the measuring process, the exact result is clearly visible in the display window which is positioned at the side of the measuring rod. As the head piece has a lock knob, the result remains visible after the measuring process. A further advantage: the Seca 216 is ideal for international use as the scale is printed on both sides. It can be inserted either way round into the plastic profile so that the result is shown in either centimeters or in centimeters/inches.

- Measuring range: max. 55.3" / 138 cm, variable from 1.4 – 90" / 3.5 – 230 cm
- Graduations: 1/16 inches (1 mm)
- Product Dimensions: 4.7 W x 60 H x 8.5 D inches
