## Features

Scales intended for mobile use have to be lightweight. The compact seca 876 weighs in at less than 4 kilograms. This scale is nevertheless very stable and suitable for persons weighing up to 250 kilograms. It stands firmly on four leveling bases that guarantee stability, even when small children are weighed while held by an adult. The mother/child-function ascertains the tare of the weight with just the touch of a button.

- Mother-Child function for trouble-free weighing of small children.
- Large leveling base for high stability.
- Easy to transport – scale itself weighs only 4.2 kg.
- Battery power for sites without electrical outlets

### Light but stable

The base is made of a mixture of ABS plastics and Plexiglas. This combination guarantees a material with outstanding surface hardness and impact strength. Furthermore, it is easy to clean with any commercially available disinfectant. Additional steel elements in the base make sure that persons up to 250 kilograms can weigh themselves easily.

### Light but impact resistant

ABS plastics and Plexiglas are not only very stable but are also especially light, a quality that is important for those interested in mobile use of the seca 876. Just as important for use away from home is the large leveling base which allows the scale to be positioned without any trouble regardless of the surface underneath it. It's easy to step onto the scale, thanks to the flat construction and slip-proof standing surface.

### Light, but with Mother-Child function.

The scale is easy to operate even with the display and operating elements integrated in the base. Just a light tap of the toe on the scale surface turns on the scale. Infants and small children can be easily weighed while being held by the mother. All she has to do is weigh herself separately first. Then the Mother-Child function ascertains the tare of the weight

## Technical Data

- Weight capacity: 250 kg
- Scale division: 100g < 150 kg > 200 g
- Scale dimensions (WxHxD): 313 x 58 x 315 mm
